

CHIMERA

PERFECT LIGHTING

2007/2008 Catalog
Photo / Film / Video Lighting

"While I've been using Chimera products for over two decades, their strip banks were not part of my battery of tools, until recently. I've been creating a body of work expressing the combined power of nature with human physicality and spirit. The strips, in all their sizes, provide the essential lighting control I need to make exactly what I want to produce happen, whether I am on location or in the studio."

- Jeff Boxer

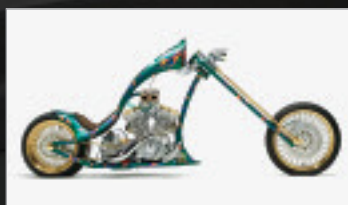

"Chimera makes the best softboxes I have used. They don't yellow over time and provide all the accessories I could ever want. I almost always use them with the eggcrate fabric grids to contain the light."

- Michael Grecco

"I once had the pleasure of hearing a lecture by the late, great W. Eugene Smith. He said he used only available light. Any light of any kind that was available, he would use it. Light is the foundation, spirit, and soul of our photographs. Chimera is some of the great light available in my opinion."

- Jack Reznicki

"With a Chimera F2 the sky has no limit; it is virtually at your disposal. You can count on the 'Golden Hour' at any time of day."

If photography means to write with light (from the Greek), then owning a Chimera F2 will offer you the talent of a fine calligrapher to trace the line of any motor vehicle with a clean and uninterrupted highlight. It is the only available lightbank large enough to do so and yet portable enough to carry on location."

- Tom Zimmeroff

President's Letter

For the nearly 30 years that Chimera has been providing the best and most innovative lighting products to professionals and serious imagemakers in the film, video and photographic community, we have experienced great changes in our industry and profession. Professionals, technicians, imagemakers and companies have had to transform and adapt to change or perish. Digital technology, computers, the internet, worldwide sourcing and production availabilities, and many other factors have impacted all of us.

Advances in the scope of products available have brought the art of image making to an ever broadening number of artists world wide. The new innovations have placed an array of tools and information in the hands of all imagemakers, but there still remain the constants required for true genius – talent, individuality, uncompromising standards, vision, creativity, and courage. Hidden by the blur of technology and the pace of change are the basic principles of success that have been present in the artist forever.

As you will see in this catalog, Chimera continues to transform and adapt to the ever changing landscape while at the same time, continuing its uncompromising standards. Chimera's overriding goal is to provide our customers and dealers with products and services of unparalleled value that consistently exceed your expectations in quality, performance and reliability. We continue to strive for our customers to have as much pride in Chimera's products as we do.

Gary Del Fium
President

"With lighting being the most variably creative aspect of any production, it is important to have the right tools that can shape the light in order to depict the mood and texture of a scene and the characters in any particular script. Chimera provides an impressive array of Soft Boxes that allow me to get the wrap and the reflectance I need on a subject without losing detail to highlights. I particularly appreciate the versatility of interchangeable rings, which makes it convenient to use the same boxes on different light sources."

- Tom Musto

"I never place a lighting order without including Chimera Lightbanks. I can't imagine shooting without them. On my last Emmy nominated HBO movie, Mrs. Harris, we used many different sizes and shapes, including the Chimera Lanterns. One of my favorite ways to use Chimera banks is with the Barger-Baglite. There isn't a smoother, more even wrap around light in the business."

- Steven Poster ASC

CHIMERA System

For help for selecting your Chimera Lightbanks, Speed Rings, and Accessories, see the Solutions section at www.chimeralighting.com

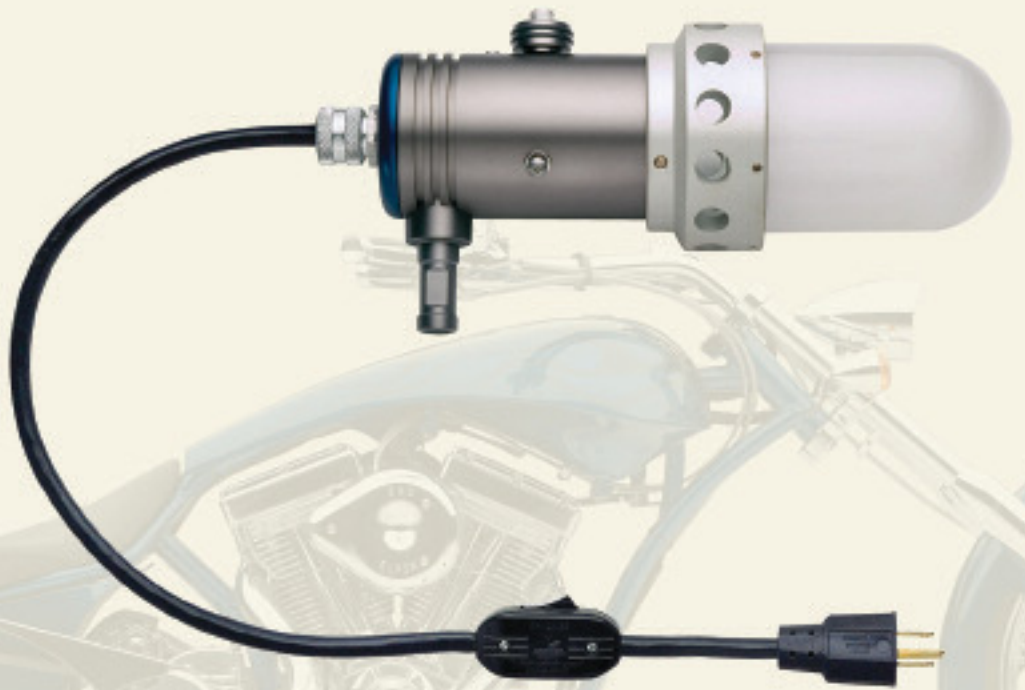

Triolet™

CHIMERA's versatile Triolet can accept 3 lamp styles. With its unique new 2-pin screw-in adapter, the small, popular 650 watt 2-pin style lamps can be used (the protective glass dome assembly should be used with 2-pin lamps). The Triolet directly accepts Mogul base lamps and medium based bulbs via a screw-in adapter. The **CHIMERA** Triolet emits a broad, omni-directional light that is compatible with Lightbanks, Lanterns, Octabanks, or even without a modifier for a bare-bulb light effect. Both models come equipped with Quick Release Speed Rings that bayonet onto the housing.

#9930 – Lamp fixture, attached 15" power cord with in-line switch, and a #2930QR Quick Release Speed Ring. Suggested List / \$299.00

#9950 – The #9930 above plus protective glass cover and 2-pin adapter. Suggested List / \$350.00

#9965 – 2-pin Conversion Kit. Includes 2-pin screw-in adapter plus protective glass dome assembly. Suggested List / \$65.00

New Pro

Birdcage™ Lantern

Inspired by a working cinematographer Rich Underwood, Cinematographer/Cameraman, and refined by Chimera's engineers, the new **CHIMERA** Birdcage Lantern light has emerged as a unique addition to the **CHIMERA** family of Lightbanks. This new innovative design offers flexible use – hang it, stand it up, lay it down, put it on a stand with the new **CHIMERA** #3860 Stand Adapter. The light can be shaped with the adjustable black skirt, adding a glow where you desire a small to moderate area of soft accent light.

The new **CHIMERA** Birdcage stands approximately 14" and comes complete with a Mogul Base fixture for 500-watt lamps plus a screw-in adapter to allow the use of standard household lamps (Stand Adapter and Lamp not included).

#1810 – Fixture; Mogul Base; 8' power cord with in-line switch; top handle; mount stud, Diffusion cover, Black / Silver wrap panel, and a Household Medium base adapter. Suggested List / \$395

ducts 07

Single and Dual Axis CHIMERA Stand Adapters

Strong, positive locking Stand Adapters from **CHIMERA** give you confidence in mounting larger banks and lights. The Dual Axis **CHIMERA** Stand Adapter allows tilt and swivel for ultimate light placement. Also, the Dual Axis model can act as a floor level light stand. These stand adapters accept industry standard 5/8" studs (included).

#3860 – Single Axis Stand Adapter / \$50

#3865 – Dual Axis Stand Adapter / \$55

Extremely lightweight and portable, CHIMERA Video PRO Lightbanks are the proven choice for small, open-faced instruments up to 1,200 watts.

The perfect answer for controlled soft lighting on small sets. Great for use as a separation light or soft fill.

Video PRO Banks come with a removable internal baffle for broad, even highlights and have soft silver interiors. They are available in XXS to Large sizes and fit **CHIMERA** Dedicated and Circular (3 to 9 inch sizes), as well as all Strobe Speed Rings.

The popular “**Plus**” series includes **full**, **half** and **quarter** density front diffusion screens. The “**Plus 1**” Lightbanks are equipped with one **full** diffusion screen. Both versions accept our complete line of Light Control Accessories on pages 26-27 and Replacement Parts on page 29.

Standard depth Video PRO Banks come in eight sizes, five rectangular banks (3:4 front screen ratios) and three Strip Banks (1:4 front screen ratios) allowing for a long and narrow diffused light source. In addition, Video PRO Shallow Banks, which are up to 20% more shallow front to back, come in our four standard sizes.

CHIMERA offers three series of Lightbanks for instruments up to 1200 watts. For years the industry standard around the world has been the **CHIMERA** Video PRO Banks. An option recently provided are the Video PRO Shallow Banks. The Medium and Large Shallow Banks are popular for tighter sets. For Fresnel lights see Daylite Banks on pages 6-7.

See Bill Holshevnikoff's Lighting Series in the Chimera Reference Page (Solutions section) at www.chimeralighting.com

“Chimera Lightbanks bring a beautiful light quality to my work. Whether it's television, film, HiDef or DV, **CHIMERA** Lightbanks consistently bring a beautiful light quality to my work. I like to work the banks in close - and, because the light is so soft, it's really easy on the talent. It's simple, quick, gorgeous lighting that I can take with me on any shoot.”

- Bill Holshevnikoff
Director of Photography

Daylite Banks, available in three styles – Junior, Standard and Senior – feature CHIMERA's innovative deep design, ideal for use with a range of Fresnel lights and include a removable internal baffle.

The **CHIMERA** Daylite series incorporates high quality materials built to withstand the rigors of very high temperatures for hours at a time.

Daylite Junior Banks

For use with small, popular narrow-beam instruments up to 1,200 watts. Daylite Junior Banks require Daylite Junior Speed Rings on page 21-22.

Daylite Standard Banks

Built to handle the heat from instruments up to 12,000 watts used on motion picture and commercial sets. Daylite Standard Banks come in Small, Medium, and Large and fit **CHIMERA** Dedicated and Circular Speed Rings (pages 21-22) in the 9 to 21 inch range.

Daylite Senior Banks

Perfect for the really big jobs requiring large lights up to 24,000 watts. The Daylite Senior Bank comes in one size and uses **CHIMERA** Speed Rings (page 22) from 24 to 29 inches.

Daylite Junior Banks

The popular “**Plus**” series includes **full**, **half** and **quarter** density front diffusion screens. The “**Plus 1**” Lightbanks are equipped with one **full** diffusion screen. Both versions accept our complete line of Light Control Accessories on pages 26-27 and Replacement Parts on page 29.

The difference between Daylite Junior Series and Video PRO Banks may not be readily apparent from the front, but a side profile shows they are quite different. Up to 50% deeper than Standard Banks, the increased depth of the Daylite Series allows the full-flood beam of a Fresnel fixture to fill the front diffusion screen and deliver beautiful light from its narrow beam.

All Daylite Banks are compatible with our extensive line of accessories including Barn Doors, LightTools™ Soft Eggerate™ Fabric Grids, Honeycomb Metal Grids, Color Correction Screens, and Bobbinette Scrims.

Quartz Banks are standard depth Banks designed to modify HMI PAR and Tungsten open faced lights up to 12,000 watts into a big, beautiful, broad source!

CHIMERA's exclusive quality materials are built to withstand the rigors of high temperatures from lights up to 12,000 watts for hours at a time. Comes with a removable internal baffle for broad, even highlights. Used with Circular Rings which accommodate lights with front end sizes from 9 to 21.5 inches. (page 22)

The popular **"Plus"** series includes **full**, **half** and **quarter** density front diffusion screens. The **"Plus 1"** Lightbanks are equipped with one **full** diffusion screen. Both versions accept our complete line of Light Control Accessories on pages 26-27. They include Barn Doors, LightTools™ Soft Eggcrate™ Fabric Grids, Honeycomb Metal Grids, ColorCorrection Screens, and Bobbinette Scrims. Replacement Parts are on page 29.

CHIMERA quality lighting for on-camera video lights.

Sold as a complete “kit” with all mounting hardware included for your specific light (no separate Speed Ring needed).

Easily mounts and locks onto a standard 5/8 inch stud (not included).

Comes with quick mounting front diffusion screens: one standard full density and one quarter density “silent fabric”

Soft, even lighting eliminates harsh shadows, producing a more pleasing and natural look.

The CHIMERA Super PRO system offers natural, window-like lighting from strobes that is both controllable and versatile for all kinds of subjects and locations.

Features a recessed front screen that controls lens flare and fall-off and also allows the attachment of accessories.

Removable internal baffle increases diffusion and gives a more even spread of light across the front screen with the option to take it out when more power is needed.

Choose between silver interior walls for slightly more specular highlights or white for a little more even spread of light across the front screen. Shallow Banks come with Soft Silver interiors.

Super PRO Banks come in five sizes of rectangular Banks (3:4 front screen ratios) and three sizes of Strip Banks (1:4 front screen ratios). Super PRO Shallow Banks (up to 20% more shallow front to back than the SuperPros) come in four sizes.

Full compatibility with all **CHIMERA** accessories, including Barn Doors, LightTools™ Soft Eggcrate™ Fabric Grids, Honeycomb Metal Grids, Color Correction Screens, and Bobbinette Scrims (page 26).

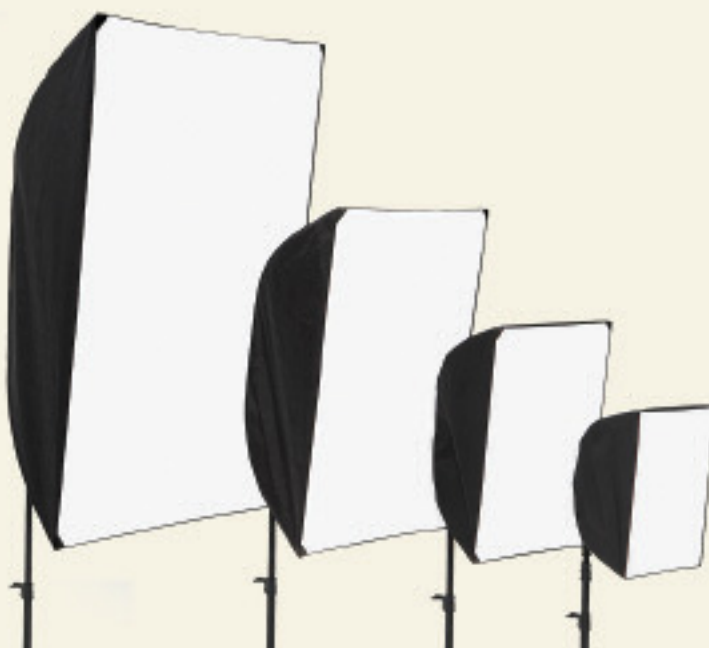

PRO II's are the perfect solution when seeking CHIMERA's uncompromising quality in a classic economical design.

Flush front screen produces the broadest light possible and creates a soft edge transfer and clean edges when highlight reflections are seen in your subjects.

Comes with a white interior and removable internal baffle for broad, even highlights.

Sewn-in front screen allows fast set up and tear down when time is of the essence.

*7.5 rings work best with 1/2" shorter poles.

The ultimate in big job lighting for in-studio or on-location, CHIMERA F2 Lightbanks provide large, clean, continuous specular highlights.

Soft Silver interior of the F2 makes an extremely efficient light source.

An internal removable baffle further diffuses the light for incredibly even highlights.

Lights, preferably bare-tube strobes, bare-bulb HMI's, or wide-beam open-faced tungsten, mount on 5/8 inch baby pins.

Sizes range from 10x20 to 15x40 feet.

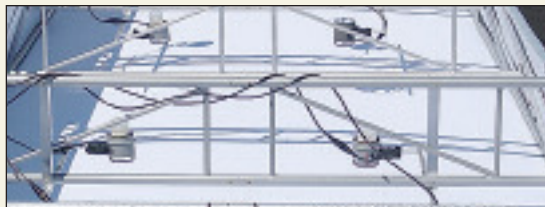

The Modular F2 Frame is composed of 5 foot wide by 10 foot long sections which guarantee fast, efficient set-ups and a more rigid structure in the largest sizes.

Under Development

CHIMERA is re-designing a component F2 system for more flexibility of use – for both studio and location.

Where to Rent F2 Lightbanks –
see the Support Section at
www.chimeralighting.com

The F2 allows you precise light placement to insure even light distribution to the front diffusion screen.

Internal baffle for even light spread.

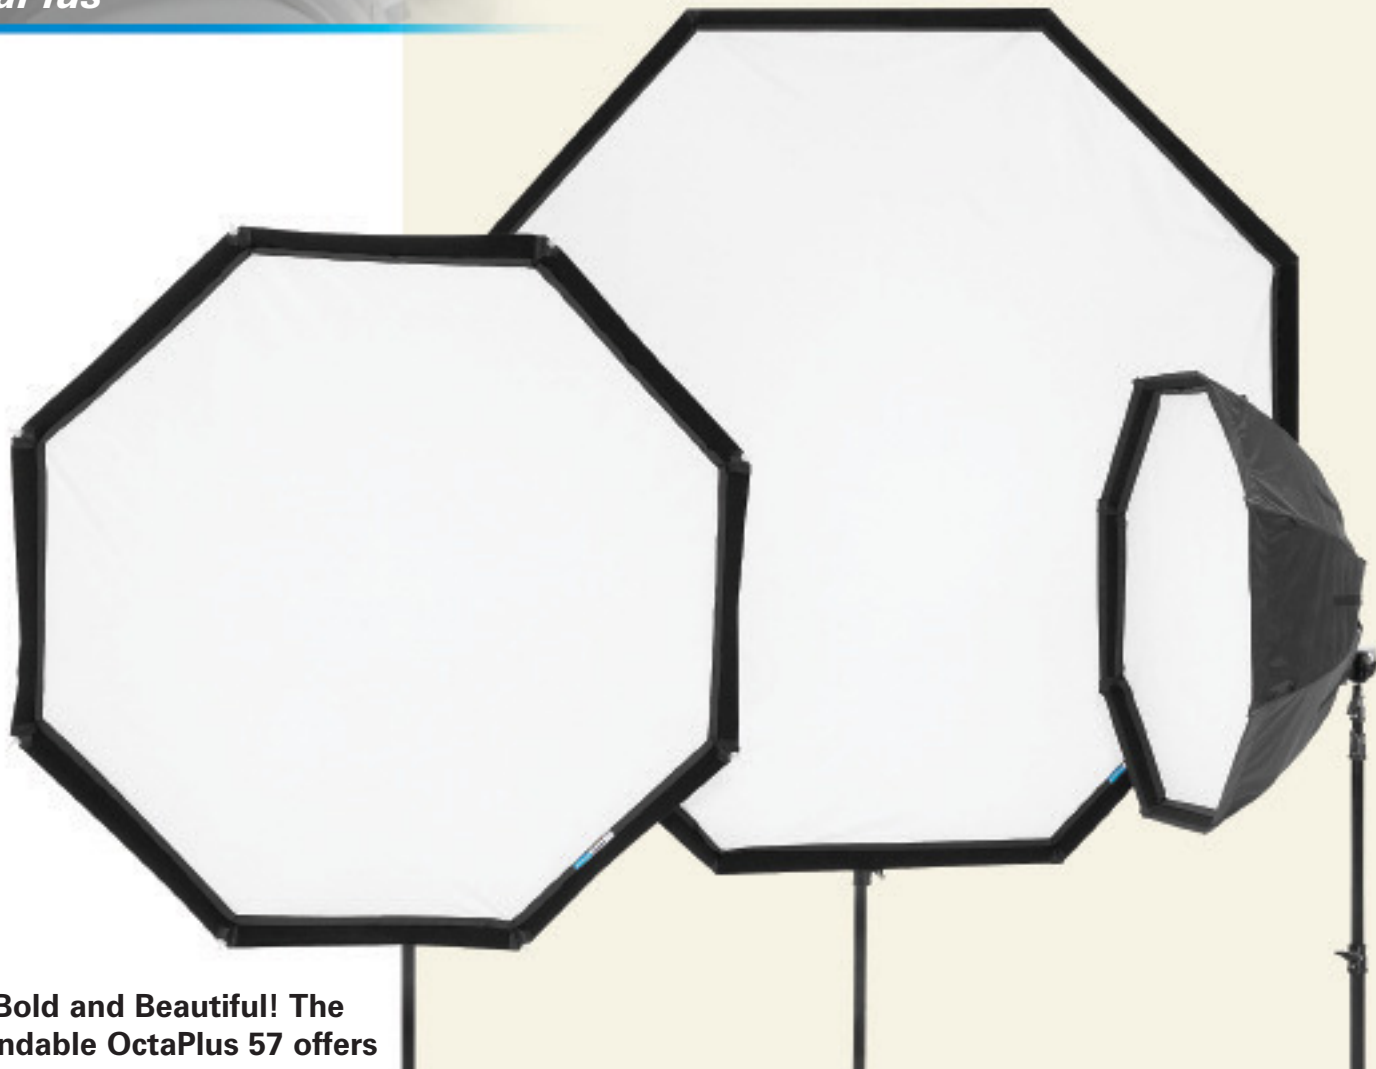

Lights mount in every 5 square feet.

Sizes range from 10x20 to 15x40 feet.

Modular F2 Banks

Size		Depth		Weight		Light Mounts	Item #	Retail (USD)

Big, Bold and Beautiful! The expandable OctaPlus 57 offers unique possibilities.

Radical patented design converts the 5-foot OctaPlus into the 7-foot OctaPlus 57 with an easy to use Expansion Kit (no tools required). Two Lightbanks in one! See inset photo.

The Soft Silver interior with unique graduated baffle in the OctaPlus 5 and OctaPlus 57 create a highly efficient and even spread of light.

Also available as a 3-foot, non-converting OctaPlus with a standard baffle for those who need a smaller bank which creates rounded highlights.

All are compatible with strobes and continuous light sources up to 1,200 watts and require an OctaPlus Speed Ring.

Revolutionary Expansion Kit extends the Bank an additional 2 feet.

Lanterns

Another exclusive CHIMERA innovation, Lanterns serve well as a central soft light for round-table interviews and for filling interior shooting spaces with soft, ambient light.

Lanterns can be used with strobes or continuous light sources and can be set up on any Speed Ring from the Strobe or Video PRO Bank category. For maximum effectiveness use with a “bare bulb” type lighting instrument.

The unique Pancake Lanterns, with innovative, removable, zipper-panel skirt (optional), offers great possibilities for fine-tuning light fall-off.

Strobe Speed Rings

The backbone of the **CHIMERA** system, we make the best Speed Rings available fitting just about every lighting instrument made.

Quick Release Ring

The **CHIMERA** Quick Release Ring is constructed of high-grade 6061/T6 aircraft aluminum and with its unique patented design, the Quick Release Ring allows you to set up a Lightbank as quickly as an umbrella! A flip of the lever allows you to easily release the tension of the Lightbank poles, simplifying setup and tear down of larger Lightbanks and Strip Banks. Ideal for the quick folding of Lightbanks to move through doorways or narrow sets.

* Strobe Banks are supplied with poles to fit rings less than 7.3". Rings 7.3" and larger work best with 1/2" shorter poles.

** Will work with either OctaPlus (8 poles) or Standard (4 poles) Lightbanks. May require a #3770 Stand Adapter for OctaPlus 5 and 57.

To convert your Speed Ring to a Quick Release Speed Ring, see the Solutions section at www.chimeralighting.com

Speed Ring Support/Grip

Speed Ring Support and Lighting Grip

Our heavy duty brackets and stand adapters make it feasible to securely support more weighty configurations such as a Medium Lightbank with a Metal Honeycomb Grid by using a Universal Grip Head Adapter and a 2-1/2 inch Grip Head

Single and Dual Axis CHIMERA Stand Adapters

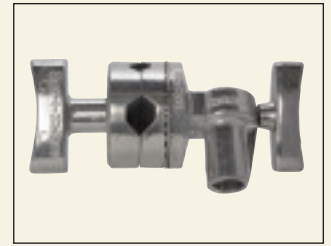

New strong, positive locking stand adapters from **CHIMERA** give you confidence in mounting larger banks and lights. The Dual Axis **CHIMERA** Stand Adapter allows tilt and swivel for ultimate light placement. Also, the Dual Axis model can act as a floor level light stand. These stand adapters accept industry standard 5/8" studs (included).

Ballistic Cloth Duffles

Keep your gear organized, protected and ready to go. Tough **Standard** duffles will ensure your gear stays organized and clean. **Padded** Duffles provide added protection for your most important gear and are great for traveling.

The Travel 1 and 2 are designed to fit inside of one another for an extra layer of protection from baggage handlers. Plus, you can divide the weight for easier carrying upon arrival.

Continuous Source Speed Rings

The center of the versatile CHIMERA Lightbank System is the Speed Ring which allows you to connect your Lightbank to a continuous source lighting instrument.

Dedicated Speed Rings are uniquely designed to fit a specific lighting fixture.

Circular Speed Rings (see chart on pages 22 - 23) are designed to fit the barn door ears of your light.

Adjustable Speed Rings are a great solution when you have a variety of lights or an unusual lighting instrument.

Circular Speed Rings Measurement Guidelines

NOTE: Diameters may differ from the standard scrim size for your light. Check your Speed Ring selection by measuring between the barn door holders.

Adjustable Speed Rings*

Table notes:

*1 Can use with 8132 - 8137 Video Pro 2K Lightbanks. 2K Open-face fixtures only. *2 Holds up to three lights. *3 Holds up to four lights. (Know the heat limitations of your lights.)

*4 Includes CHIMERA Stand Adapter. *5 Includes Quartz Stand Adapter and a 2 1/2 Grip Head Adapter. *6 The 9015 is the best choice of Speed Rings for using four Strobe Heads with a Quartz Bank.

*7 The K 5600 400/800 Buglights use 9780AL only. *8 #3700 is recommended Stand Adapter for the Quick Release Rings. *9 OctaPlus and others use the preferred #3770 Stand Adapter.

Circular Speed Rings are designed to fit the barn door ears of your light. Note that this diameter may differ from the standard scrim size used. Double check your Speed Ring selection by measuring the diameter between the barn door ears. Compare this with the figures in the Speed Ring Diameter column. All prices are listed in USD.

* Call for OctaPlus and Quick Release Ring Stand Adapter compatibility.

***1 preferred Speed Ring for this light is found in the Dedicated Speed Ring Table. *2 Of the two frame sizes available for 9 inch rings the Video PRO and Daylite JR Speed Rings are more compact. Quartz and Daylite rings prevent any obstruction of the light. *3 Strand has been redesigned a number of times with different sized accessories. Please measure the distance between the barn door holders of your lights to insure that you are purchasing the correct ring.**

Panels and Frames

These compact and rigid frames allow you to easily create your choice of diffusion, Bobbinette Scrims, and bounce fill sources without the use of tools.

PRO Panel Kits include a frame, white/black cloth, 1/2 grid diffusion cloth and a duffle.

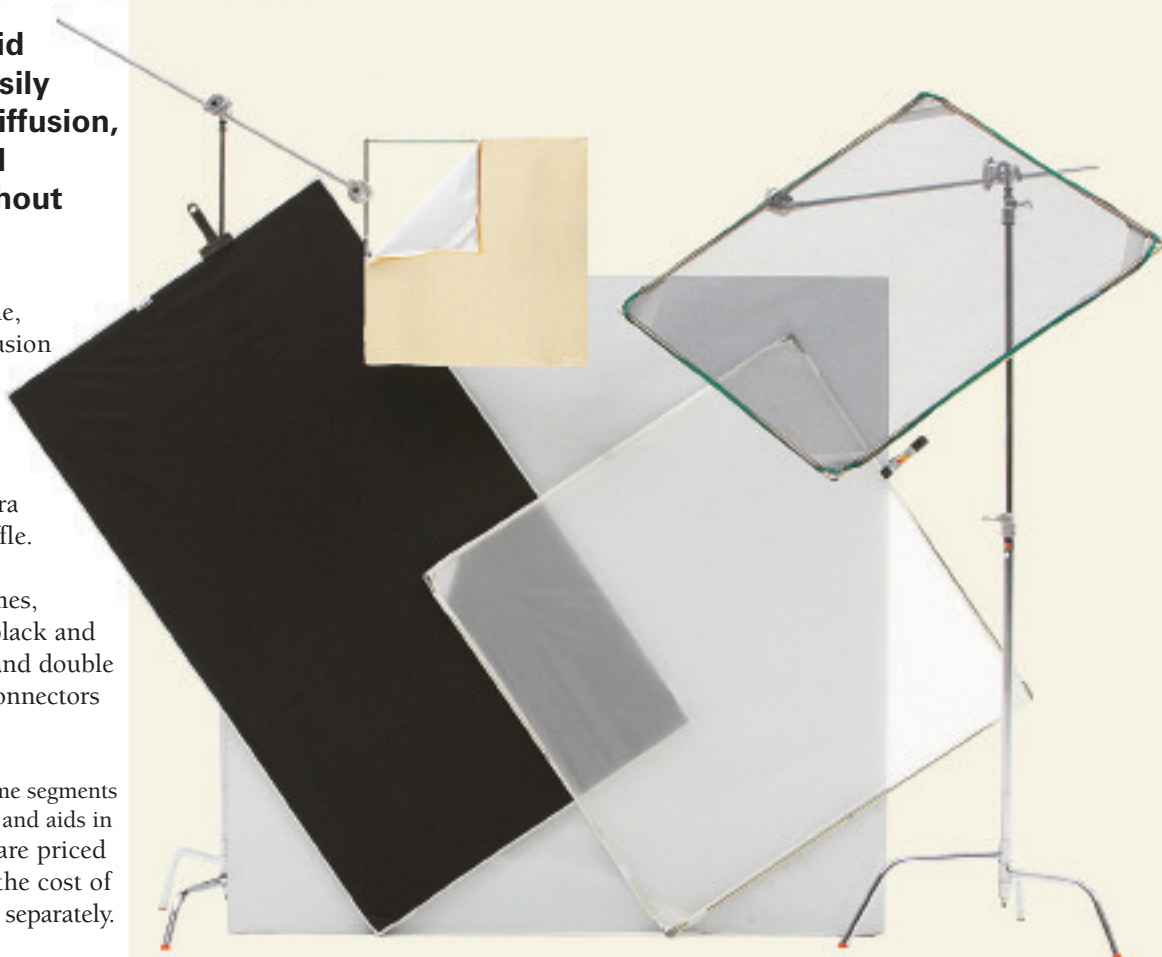

Cameo Kit includes a frame, full diffusion **CHIMERA** cloth, white/black and silver/gold zebra cloth, two grip heads and a duffle.

High Def Kit includes two frames, 1/2 and 1/4 grid cloths, white/black and silver/gold zebra cloths, single and double Bobbinette Scrims, two frame connectors and a duffle.

Internal bungee cord keeps the frame segments together during storage and travel, and aids in super fast set-ups. All seven kits are priced to save approximately 20% off the cost of all components when purchased separately.

The specially designed pin-grip system on the frame allows one to set up and lock the frame in place with a single, standard 2.5" grip head.

Lighting with Panels and Frames are illustrated by Dean Collins Programs. See the CHIMERA Reference Library on page 29.

Window Patterns

Versatile window patterns solve the difficult production dilemma of generating interesting lighting patterns with open-faced or Fresnel lights.

Durable and lightweight Window Patterns work with CHIMERA Panel frames for lighting backgrounds for interviews, portraits, still life and much more.

No more pulling venetian blinds from windows or chopping tree branches to create the look you want. Two patterns can be combined with the frame holder, or be creative by using one pattern and a color gel! Easy to use and attaches to Velcro™.

Available in two convenient kits with a frame, holder, duffle and 6 patterns each plus a clear pattern for logos, etc. Window patterns can also be purchased separately.

Light Control Accessories

Our extensive line of accessories allows you to customize the light from your Lightbank to create just the right look.

Lighttools™ Soft Eggcrates™ Fabric Grids

Keeps soft light on your subject, without spilling light onto other areas of the shot. Collapsible, portable and extremely lightweight – an effective way of controlling light fall off.

Stretch Frames

Keeps Fabric Grids from sagging and keeps cells square, **especially useful when using large Lightbanks.**

Honeycomb Metal Grids

Offering the ultimate precision light-control, these grids are ideal for studio use. They are also transportable in their included shipping crates.

CC Screens

(available on a special order basis) Color Correction gels laminated to a **CHIMERA** front diffusion screen allow you to balance light sources of different color temperatures.

Barn Doors

Control spill conveniently with **CHIMERA Velcro™** – on Barn Doors.

Bobbinette Scrims

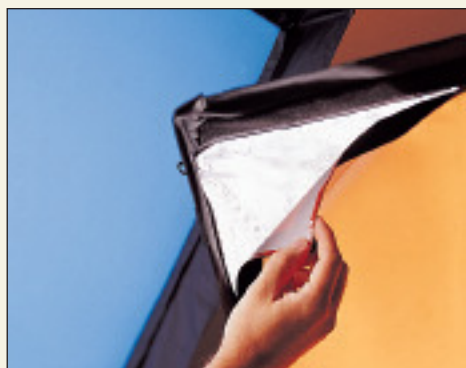

An effective lightweight tool for reducing light intensity without sacrificing softness or altering color temperature. For most Lightbanks, Lanterns, and Panel Frames.

Professional Lighting Kits

CHIMERA is pleased to offer some of our most popular products in convenient and economical kits. The 8000, 8005, and the New Combi Bank kits come complete with our high quality duffles for easy storage and transport. These kits are a great value in price and features.

#8000 / #8005 24x32 Video Light Kits

These **CHIMERA** lighting kits come ready to go. They are perfect as starters or as additions to your existing lighting gear. Both kits contain a 24"x 32" Video PRO Plus 1 Lightbank with a Lighttools™ Soft Eggcrate™ 40 degree Fabric Grid, 10'8" Avenger light stand, a Mogul Socket Speed Ring, a #3860 Stand Adapter, and a 44"x 9"x 9" **CHIMERA** Duffle to take your lighting on the road. The 8000 Kit comes with a 500-Watt lamp and the 8005 Kit has a 1000-Watt lamp.

CHIMERA Combi Kits for Still or Video

Whether you use electronic flash or continuous light sources, the **CHIMERA** Combi Lighting Kits get you in business in a hurry! Utilizing the light shaping attributes of these three Lightbanks, there is hardly a situation you can't overcome. This amazing threesome uses the heat resistant Video PRO Lightbanks for continuous lights and the Super PRO Lightbanks for Photographers using electronic flash. Just add your favorite lights, stands, and the appropriate Speed Rings, to embark on any lighting assignment.

#8050 Video Combi Kit

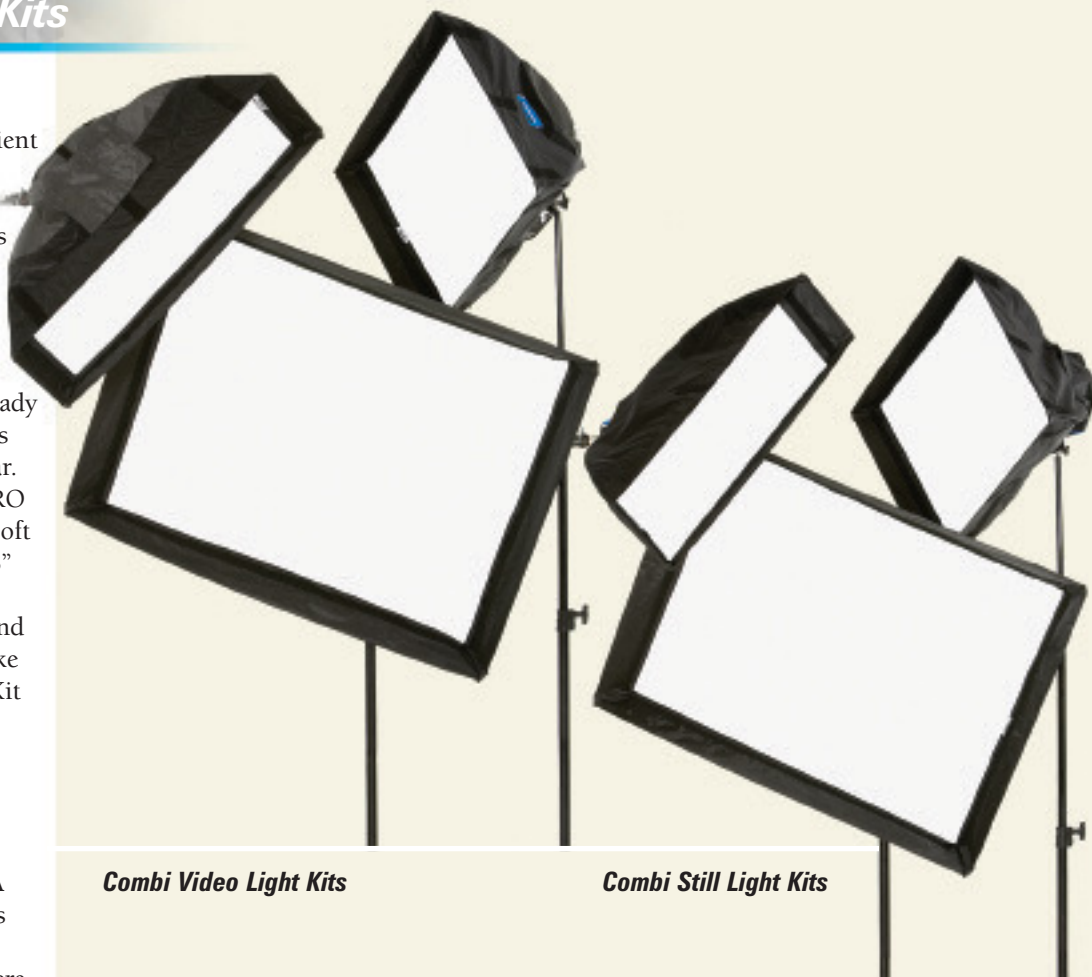

Contains: 1 small 24"x32", 1 medium 36"x48" Video PRO Lightbanks Plus 1 small 9"x36" Video PRO Strip Bank. This kit comes ready to travel with a Standard #3960 Duffle (9"x44")

#8060 Flash Combi Kit – Silver Interiors

Contains: 1 small 24"x32", 1 medium 36"x48" Super PRO Lightbanks small 9"x36" Super PRO Strip Bank. This kit comes ready to travel with a Standard #3960 Duffle (9"x44")

#8065 Flash Combi Kit – White Interiors

Contains: 1 small 24"x32", 1 medium 36"x48" Super PRO Lightbanks small 9"x36" Super PRO Strip Bank. This kit comes ready to travel with a Standard #3960 Duffle (9"x44")
